COMPLETE CATALOGUE

### Dear Readers,

When we're asked what we do all day long at VALINOS, we answer quite honestly and say that we always put our best foot forward. We are proud of what we do because we understand that feet have a lot to do with how good we feel. And that in turn has a lot to do with how well the shoe fits. Therefore, because every foot is different - in fact unique - we make footwear that fits everyone perfectly all the time. How do we do it? By carefully measuring your feet and then custom-making footwear to order - just for you. Made-to-measure, so to speak. To do this, we draw on our years of pedorthic experience and also make use of a pretty clever bit technology we developed... This is where the high-tech part comes in! To be more precise, we use special design software and the most state-of-the-art CNC milling and printing technology. There is then also lots and lots of manual labour and of course the finest materials.

Now, of course, you may well say: "Well that's not rocket science, other manufactures do exactly the same". Hmm, that's true of course, but there is a significant difference... We know our customers very well and we understand that they feel much more comfortable when their shoes both fit well and look good. And that's what our customers love about our footwear.

To put it simply: Great comfort. Great look. Great mood.

At VALINOS there are over 35 million ways to create your very own personal pair of shoes by choosing from our various models, colours and materials. And not only that, but at VALINOS every pair is specially made to fit your feet and is custom-made to order.

Design your own!

### **FOOTBED SHAPES**

VALINOS are tailored-made sandals that are uniquely created for your feet and your needs. So that you can enjoy our 100% made-to-measure comfort, we adapt the footbed so that both its contours and its external measurements fit your foot perfectly. You can choose the width based on the VALINOS shape or the new HALLUX shape.

Both are fully tailored to the unique shape of your foot.

### **HALLUX**

Our **HALLUX** model is specially adapted to the needs of people suffering from hallux valgus. The forefoot area is narrower and we give the necessary consideration to making corrections to ensure comfortable walking.

### **Special Shapes**

Most VALINOS models can also be ordered in special sizes. This makes it possible for us to cater to each foot even more personally.

### **FOOTBED DESIGN**

**BEACH·FIT·SANDALS·TRAIL** 

Our BASIC model consists of cushioning material and comprises a footbed, strap and an outsole. Additionally, you can customise your VALINOS by choosing from the following styling options.

### **STYLING OPTIONS**

### **CUSHIONING TYPES**

#### **FITNESS**

Available for the models Beach, Fit, Sandals and Trail

Our standard footbed FITNESS is characterised by a gentle roll-off in the forefoot and heel area. This leads to a comfortable walking movement and a great sense of well-being with every step.

OR ALTERNATIVELY -

#### **RELAX**

Give your VALINOS the ideal configuration with our unique RELAX footbed for carefree walking with maximum pressure relief. This configuration is particularly suitable for customers with toe joint problems or who put excessive pressure on their forefoot.

#### **OPTIONAL**

(CANNOT BE COMBINED WITH HALLUX)

#### **SOFT BED**

Available for the models Beach, Fit, Sandals and Trail

For the VALINOS SOFT BED, the entire sole of the footbed is filled with soft cushioning material for a comfortable tread. We are now able to adapt very soft footbeds to the unique requirements of the wearer.

Particularly suitable for rheumatism sufferers and diabetics who can wear open shoes.

## <u>COLOURS</u> MATERIALS

When it comes to our VALINOS, we place a lot of value on quality. This includes individuality, accuracy of fit and, of course, the materials used. We only use quality-controlled, certified raw materials.

It's the only way we can be sure that the quality of our VALINOS is spot on in every respect.

Create your own uniquely styled pair of VALINOS with over 35 million possible variations to choose from. Only one pair is as unique as you are. Design your own!

### **SCAN FEET**

Every pair of VALINOS is custom made using the measurements of your feet. Your data is processed by our special design software and evaluated by our qualified expert staff. The shoes are then created on state-of-the-art CNC milling machines or 3D printer and are handmade made just for you.

ped3D Full Foot

## BESTOM-MADE TO ORDER

VALINOS are the result of years of practical experience in pedorthics.

The footbed of your VALINOS is made to meet your unique requirements taking pedorthic aspects into consideration. Our knowledge of the latest manufacturing technologies is an added benefit when it comes to making your VALINOS.

Thanks to our practical experience in orthopaedics and our manufacturing expertise, your VALINOS are specially made for you as a high-tech product.

## FOOTBED SHAPE HALLUX

BEACH · FIT · SANDALS · TRAIL

If you suffer from hallux valgus, we have a solution for you!

Specially designed for people with severe hallux valgus deformities, this footbed shape is the basis for the unique design of the footbed. The footbed shape is more accommodating and adapts better to the shape of your foot if you suffer from hallux valgus.

## CUSHIONING TYPES RELAX

### Like walking on air

This midfoot rocker is particularly suitable for anyone with toe joint problems or who put excessive pressure on their forefoot.

The midfoot rocker is always either black or white and the colour of the outsole is made to match.

valinos.you Beach Collection

### The Classic

The toe-post sandal with the feel-good factor.

Our VALINOS BEACH collection combines the best aspects of a fashionable shoe and a custom-made footbed. The correction points are designed in a way that allows fatigue-free walking without incorrect weight distribution. In the toe zone, the modelling is specifically adapted to the shape of your toes.

This guarantees that your VALINOS will fit perfectly and you won't have to scrunch up your toes to keep them on. Using the measurement data from your feet, your VALINOS are individually modelled and constructed. Furthermore, foot corrections are carried out on an individual basis as required. The special insole design fixes the heel in place, thus preventing the typical "flip-flop" pronation in this area.

### **BEACH***Cross*

#### **BASIC**

#### **OUR VALINOS FOR CORRECTING HALLUX VALGUS DEFORMITIES**

The special VALINOS footbed supports the correction provided by the toe and ball straps and relieves pressure on the foot in a unique manner. VALINOS CROSS models thus ensure active correction of hallux valgus deformities with every step. Furthermore, the unique design of the footbed and the individual adjustment provided by the toe corrector are an effective remedy. There are unique benefits that come with custom-made footwear.

### 1. The diagnosis

Hallux valgus deformity

## 2. How the big-toe strap works

The big-toe strap has a precise, predefined corrective influence on the big toes. This provides therapeutic correction and allows the best-possible position with maximum straightening of the big toes to be achieved.

## 3. How the ball strap works

The outer ball strap exerts a gentle, predefined pressure on the bunions. This pressure stabilises both the metatarso-phalangeal joint and the deformity correction provided by the other strap.

#### 4. The result

Thanks to the adjustment provided by both straps, a gentle pressure is exerted on the foot, which can significantly relieve the discomfort caused by hallux valgus. The straps also have a cosmetic effect as they conceal the bunion on the metatarso-phalangeal joint of the big toe.

## **BEACH***Cross*

valinos.you Fit Collection

### Our tried-and-tested footbed for top form

This VALINOS model is based on the tried-and-tested footbed of our VALINOS BEACH models.

As there is just a single strap over the forefoot, the VALINOS FIT models are excellent for use as training and therapy devices and for activating your foot muscles as they work to keep the shoe on the foot.

valinos.you Fit Collection

## A wide range of configurations for a unique design that reflects your personal style.

## FIT One

### **BASIC**

With active training effect thanks to the single guiding strap over the forefoot. The FIT ONE models feature a tapering strap with a buckle to adjust the width.

Gangehi

valinos.you Fit Collection

# SANDALS

### Support and Comfort

The SANDALS model is also based on the special, tried-and-tested footbed construction of our VALINOS BEACH models.

Starting with this footbed shape, we take great care and attention to ensure the special requirements for our VALINOS SANDALS such as great support and stability are met.

This creates the highest degree of comfort.

SANDALS models are available with straps with two or three buckles. For those with specific foot problems there is a strap with two buckles and a heel strap. This provides greater stability and more support.

VALINOS SANDALS are ideal for wearing as slippers and can be worn all year round.

# SANDALS

## A wide range of configurations for a unique design that reflects your personal style.

## SANDALS Two

#### **BASIC**

The classic shoe for home and leisure with our special cushioning that is adapted to your needs. Every model is unique - just like your feet!

Statia

### **SANDALS** *Three*

#### **BASIC**

Where the SANDALS Two model has two straps, the SANDALS Three model has three! These narrower straps give the foot a more refined and elegant look, which is particularly popular among women.

## **OUTSOLES**

OS14 Outsole trail

#### **VALINOS**

VALINOS insoles give you the tried-and-tested function and comfort of our VALINOS footwear. To ensure that VALINOS insoles fulfil this 100%, we have adapted them to different purposes with regard to shape and material.

#### VALINOS SPORT

Suitable for closed sport shoes.

Material: pedmedium yellow

Covering: peddur (robust, abrasion resistant,

high-quality)

#### VALINOS WORKER

Suitable for orthopaedic and comfort footwear as well as wide-fitting work shoes.

A comfortable, functional, orthopaedic insole with maximum correcting effect, which is very pleasant to wear thanks to its special characteristics.

Material: pedsoft 2 black

Covering: peddur (robust, abrasion resistant,

high-quality)

#### VALINOS ALLDAY

#### Suitable for comfort footwear.

A comfortable basic insole for everyday use for people with non-problem feet.

Material: pedsoft 2 blue + Base pedhard
Covering: peddur (robust, abrasion resistant,

high-quality)

valinos.you VALINOS*Insoles* 

#### VALINOS ELEGANZA

# Specially developed for wearing in high heels and very fine, narrow shoes.

Extremely fine insoles with no heel cup or pad.

Anatomic transverse arch support.

Longitudinal arch modelling with counter-bearing medial flange. This is a functional, corrective and pressure relieving insole.

Material: Thermo-cork + duralux

Covering: peddur (robust, abrasion resistant,

high-quality)

#### VALINOS BUSINESS

#### Suitable for elegant business shoes.

Severe supination of the forefoot is counterbalanced by the forefoot pronation. The toe correction, D II-V, strengthens the corrective effect of the insole and provides a high level of comfort.

Material: pedsoft 2 blue + Base pedhard

Covering: peddur (robust, abrasion resistant, high-quality)

#### VALINOS DIABETES

## A wide-cut insole for therapeutic and custom-made shoes.

A cushioning insole that is sculpted according to the shape of the foot with a very comfortable heel and ball zone. This is insole is only used in therapeutic and custom-made shoes.

Material: pedcom 3 white

Covering: peddur (robust, abrasion resistant,

high-quality)

#### VALINOS CHILD

#### Suitable for firm children's shoes.

Stimulating children's insoles with a proprioceptive impulse that specifically trains the lower leg muscles. These insoles are used as a prophylactic

treatment for minor skew foot problems.

Material: pedmedium white

Covering: peddur (robust, abrasion resistant,

high-quality)

valinos.you VALINOS*Insoles* 

#### VALINOS PEDREFLEX

#### Suitable for comfort footwear.

Highly stimulating insole made from a special material blend, which achieves a more intensive effect.

The effect of the reflex insoles is increased thanks to gentle toe stimulation. The more pronounced arch support makes the shoes very comfortable to wear. Suitable for comfort footwear.

Material: pedporon white

Covering: pedsilver (silver-coated

textile for an anti-septic

foot environment, odour reduction and

great comfort)
